

An Ounce of Prevention

Protect against the hazards facing your healthcare facility with the Affiliated FM online ***Healthcare Hazard Checklist*** course.

Whether it's a hospital, nursing home, diagnostic clinic or doctor's office, Affiliated FM's new online *Healthcare Hazard Checklist* course assists you in understanding and identifying the most common property risks facing today's healthcare facilities.

The free online course then helps you take practical and proactive steps to reduce or eliminate the exposures so you can prevent minor distractions from becoming major disasters.

When you complete this course you will be able to:

- Identify the types of risks present at your facilities.
- Take steps to prevent damage from natural hazards such as hurricanes, flood and earthquakes.
- Be able to implement human element programs and procedures to manage change and reduce risk.
- Better protect your facilities and keep your doors open.

To register for this and other Affiliated FM Online Training Courses, contact your Affiliated FM Account Engineer or visit <http://training.affiliatedfm.com>.
